BOARD DIPLOMA EXAMINATION MARCH/APRIL - 2019

* DIPLOMA IN COMPUTER ENGINEERING / INFORMATION TECHNOLOGY PROGRAMMING IN C FIRST YEAR EXAMINATION

Time: 3 Hours Total Marks: 80

PART - A $(3m \times 10 = 30m)$

Note 1:Answer all questions and each question carries 3 marks

2:Answers should be brief and straight to the point and shall not exceed 5 simple sentences

- 1. List the steps involved in executing a C Program
- 2. List all white space characters and give their purpose
- 3. List the format characters used in printf ()
- 4. write the precedence and associativity of relational operators
- 5. Write the syntax of for loop. Give an example
- 6. List the two ways in initialize one dimensional arrays
- 7. What is the out put of printf("%d"("z" 1), justify your answer
- 8. What are the advantages of a function
- 9. What is a NULL pointer
- 10. Write about Conditional Macro

PART - B $(10m \times 5 = 50m)$

Note 1:Answer any five questions and each carries 10 marks

- 2:The answers should be comprehensive and the criteria for valuation is the content but not the length of the answer
- 11. Explain Evaluation of logical expression with an example
- 12. Write a C Program to print all even numbers between 1 and N using do-While Loop
- 13. Write a program to generate a unit matrix with 5 rows and 5 columns
- 14. Explain Functions with arguments and without return values with a sample Program
- 15A. Explain various assignment operators
 - B. Explain about storage class variables

Page: 1 of 2

- 16. How to use pointers to two dimensional arrays explain with an example program
- 17. A. Explain how to find size of a structure. Illustrate with an example.
 - B. How to use pointer to structure? Explain with an example
- 18. Explain any two file input commands with example
