

## C16-EC/CHPC/PET-104

# 6030

### **BOARD DIPLOMA EXAMINATION, (C-16)**

#### **SEPTEMBER/OCTOBER - 2020**

#### **DECE—FIRST YEAR EXAMINATION**

ENGINEERING CHEMISTRY AND ENVIRONMENTAL STUDIES

Time : 3 hours ]

Total Marks : 80

#### PART—A

3×10=30

HINA Ditat " A.P.

**Instructions** : (1) Answer **all** questions.

- (2) Each question carries three marks.
- (3) Answers should be brief and straight to the point and shall not exceed *five* simple sentences.
- 1. State and explain Hund's principle with an example.
- 2. Distinguish between oxidation state and valency.
- 3. Define solute, solvent and solution.
- 4. Write any three applications of buffer solutions.
- **5.** Write any three differences between electrolytic cell and galvanic cell.
- **6.** Define reverse osmosis. State any two applications of reverse osmosis.
- 7. Define monomer and polymer. Give one example each.
- 8. Write the composition of (a) water gas and (b) producer gas.

5

1

[ Contd...

- **9.** Define the following :
  - (a) Pollutant
  - (b) Receptor
  - *(c)* BOD
- 10. Define biodiversity. List any four benefits of biodiversity.

#### PART—B

**Instructions** : (1) Answer any **five** questions.

- (2) Each question carries **ten** marks.
- (3) Answers should be comprehensive and the criterion for valuation is the content but not the length of the answer.

**11.** (a) Write important postulates of Bohr's atomic theory. 6

(b) Define unit cell. Draw the structures of unit cell of NaCl and CsCl. 4

**12.** (a) Define equivalent weight. Calculate the equivalent weight of the following :

- *(i)* NaOH
- (ii)  $H_2SO_4$
- (iii) Na<sub>2</sub>CO<sub>3</sub>

	(b)	Explain Arrhenius theory of acids and bases.	5
13.	(a)	Explain froth flotation process with a neat diagram.	5
	(b)	Write any five characteristics of metals.	5
		64.	

- 14. (a) State Faraday's laws of electrolysis. A current of 10 A is passed through a solution of CuSO<sub>4</sub> for 10 minutes. Calculate the weight of copper deposited on the cathode (At. Wt. of Cu is 63.5).
  - *(b)* Distinguish between metallic conductors and electrolytic conductors.
- **15.** (a) Define corrosion. Write any five factors which influence the rate of corrosion.

(b) Explain sacrificial anode method. 4

\* /6030

[ Contd...

10×5=50

5

6

4

- **16.** (a) Explain softening of hard water by ion-exchange process. 6
  - (b) Mention any four essential qualities of drinking water. 4
- 17. (a) Write any five differences between thermoplastics and thermosetting plastics.
  - (b) Explain vulcanization of rubber with chemical equation.
- 18. (a) Define water pollution. Explain any four causes of water , Acid ra Acid pollution.
- 5 (b) Write short notes on (i) Greenhouse effect and (ii) Acid rain.
