## 6005

## BOARD DIPLOMA EXAMINATION, (C-16) OCT / NOV—2018 <br> FIRST YEAR (COMMON) EXAMINATION

## ENGINEERING DRAWING

Time : 3 hours]

PART—A
$4 \times 5=20$
Instructions: (1) Answer all questions.
(2) Each question carries three marks.

1. Print the following in single-stroke sertical lettering of 10 mm size in capital letters. "BOARD DIPLOMA EXAMINATIONS"
2. Redraw the following figure to the full scale by correcting the errors in dimensioning as per $\mathrm{SP}^{-}-46: 1988$ :

3. Construct an internal tangent to two circle whose radii are 30 mm and 20 mm and distance between their centres is 80 mm .
4. Draw the auxiliary view for the inclined surface of the following view.

PART-B
$10 \times 5=50$
Instructions: (1) Answer any five questions.
(2) Each questions caries ten marks.
(3) All dimensionsare in mm .
5. A coin of diameter of 40 mm rolls on a straight surface. Draw the profile traced by any boint on the circumference of the coin.
6. A cylinder o 50 mm diameter and height 70 mm is lying on the ground with it's axis inclined at $45^{\circ}$ to VP and parallel to HP. Draw it's projections.
7. A hexagonal pyramid of base side 30 mm and height 75 mm is resting on the ground with its axis vertical. It is cut by a plane inclined at $30^{\circ}$ to the HP and passing through a point on the axis at 20 mm from the vertex. Draw the sectional fron view, top view and true shape.
8. Draw the front view, top view and right-hand side view of the object as shown in the figure below:

9. Draw the isometric view of the ribbed arrgle plate, shown below. All dimensions are in mm and the vieus are given in first angle.

10. Ahexagonal prism of side of base 20 mm and height 50 mm is standing vertically on HP with its one of rectangular faces parallel to VP, it is cut by a plane which is inclined at $45^{\circ}$ to HP, perpendicular to VP and passing through one of the top corners of the prism. Develop the laterial part of the cut prism.
