

## 3504

## BOARD DIPLOMA EXAMINATION, (C-09) OCT/NOV-2017

## DME—FOURTH SEMESTER EXAMINATION

## ENGINEERING MATERIALS

| Time  | e: 3 hours]  | [ Total Marks : 80  |
|-------|--|---------------------|
|       | PART—A   | 3×10=30             |
| Inst  | (2) Each question carries <b>three</b> mark<br>(3) Answers should be brief and straig<br>shall not exceed <i>five</i> simple sente | ht to the point and |
| 1.    | Write the differences between destructive and n tests.   | on-destructive<br>3 |
| 2.    | Sketch neatly the body-centered cubic crystal give any two examples of it.   | structure and 3     |
| 3.    | What is the function of coke and limestone in the charge of blast furnace? $1\frac{1}{2}+1\frac{1}{2}$                             |                     |
| 4.    | What are hypo-eutectoid, eutectoid and hyper-eu  | tectoid steels? 3   |
| 5.    | Calculate the percentage of cementite and pe carbon steel.   | arlite in 1·3%      |
| 6.    | What is sub-zero heat treatment?   | 3                   |
| 7.    | What is meant by pack carburising?   | 3                   |
| 8.    | What is the influence of silicon and phosphocarbon steels?   | orus on plain<br>3  |
| * /35 | <b>04</b> 1  | [ Contd             |

| * 9.   | Write any three properties and three uses of copper.   | 3   |
|--------|--|-----|
| 10.    | List any six methods of forming to shape in powder metallurgy.   | 3   |
|        | <b>PART—B</b> 10×5=5   | 50  |
| Inst   | (2) Each question carries <b>ten</b> marks.  (3) Answers should be comprehensive and the criteric for valuation is the content but not the length of the answer. |     |
| 11.    | Explain the procedure for conducting tensile test on universal testing machine, with a sketch.   | 0   |
| 12.    | Explain the phenomenon of crystallization of pure metal with neat sketches.  | 0   |
| 13.    | Explain the procedure of manufacturing pig iron from blast furnace with a neat sketch.   | 0   |
| 14.    | (a) With a neat sketch explain the cooling curve of pure iron.   | 4   |
|        | <ul> <li>(b) Explain the following reactions in iron carbon equilibrium diagram:</li> <li>(i) Peritectic reaction</li> <li>(ii) Eutectic reaction</li> </ul>     | 6   |
| 15.    | Describe the following: 4+3+   | -3  |
|        | (a) Process annealing  |     |
|        | (b) Spheroidise annealing  |     |
| 16.    | Give the composition and uses of the following: 4+3+   | -3  |
|        | (a) Muntz metal  |     |
|        | (b) Gun metal  |     |
|        | (c) Aluminium bronze   |     |
| * /350 | <b>04</b> 2 [ Contd  | ••• |

**17.** Write a short note on following characteristics of metal powder:

5×2

5

- (a) Shape
- (b) Flowability
- (c) Purity
- (d) Apparent density
- (e) Compressibility
- **18.** (a) Write any five desirable properties of bearing metals.
  - (b) Define the following mechanical properties:  $2\frac{1}{2} + 2\frac{1}{2}$ 
    - (i) Hardness
    - (ii) Fatigue
