1999	342	112	2.52	32.5	108
2000	324	101	3.84	41.6	74
2001	336	133	3.68	36.4	88
2002	420	142	3.96	49.4	98

16. You have seen an advertisement in a newspaper about a vacancy of assistant technical officer in Bharati Power Ltd., Tirupathi. Write a cover letter to the recruiting manager of the industry, expressing your interest in the position.

17. Make notes out of the following :

Occasional self-medication has always been part of normal living. The making and selling of drugs has a long history and is closely linked, like medical practice itself, with belief in magic. Only during the last hundred years or so has the development of scientific techniques made diagnosis possible. The doctor is now able to follow up the correct diagnosis of many illnesses-with specific treatment of their cause. The doctor is trained to decide when to treat symptoms and when to attack the cause. This is the essential difference between medical prescribing and self-medication. The advance of technology has brought about much progress in some fields of medicine. In many countries public health organizations are improving and peoples' nutritional standards have risen.

Parallel with such beneficial trends are two which have an adverse effect. One is the use of high pressure advertising by the pharmaceutical industry which has tended to influence both patients and doctors and has led to the overuse of drugs

* generally. The other is the emergence of sedentary society with its faulty ways of living : lack of exercise, overeating, unsuitable eating, insufficient sleep, excessive smoking and drinking. People with disorders arising from faulty habits, as well as from unhappy human relationships, often resort to self-mediation. Clever advertising aimed at chronic sufferers; who will try anything because doctors have not been able to cure them; can induce faith in a medicine. Advertisements are also aimed at people suffering from mild complaints such as simple colds and coughs which advertisements claim will clear up within a short time due to the intake of a medicinal product. These are the main reasons why laxatives, indigestion-remedies, pain killers, cough-mixtures, tonics, vitamins and iron tablets, nose drops, ointments and many other preparations are found in quantity in many households. It is doubtful whether taking these things even improves a person's health or it simply makes it worse. They may also cause poisoning and worst of all the symptoms of an underlying problem may be masked and therefore medical help may be sought. Self-diagnosis is a greater danger than self-medication.

- 18.** Read the following passage and answer the questions that follow :

People of long ago used to live in groups in caves or in jungles. They wandered from place to place hunting animals and looking for food. Then later people began to settle along or near rivers. They lived near the rivers because they were sources of water, food, trade and transport. They used the river water for drinking, cooking and washing. The river were full of fish. Birds also lived and laid their eggs near rivers. Birds got their food from rivers too. As a result, these areas provided a good source of food for the people. The people caught the fish, collected the birds' eggs and trapped the birds as food.

Rivers also made good farmland for these early river settlers. During the yearly flood, rivers carried along with them river mud which was very fertile. This fertile soil was left behind after each flood. Thus river banks or valleys were suitable places for farming. The people started to cultivate their own crops. Besides the fertile soil, rivers were also used as a form of highway. Men began to use rafts and boats as a form of water transport to carry their extra food. They sailed to another part of the river to trade with the other settlers. So they became farmers as well as a trades. When they

*

began to travel up and down the rivers, they learned about the customs and beliefs of the other settlers. As trade and transportation grew, the population also grew. These river settlements grew into cities, and these cities became centers of great civilizations like those found in early Egypt, India and China.

- (a) Why did people prefer to live beside rivers?
- (b) How did the banks of rivers become a good source of food?
- (c) How did the rivers become useful for agriculture?
- (d) What were the factors that help to grow great civilizations beside rivers?
- (e) What is the meaning of the word 'custom'?
